EDUCATION

Jomo Kenyatta University of Agriculture and Technology — Nairobi, KE

BSc. Electrical and Electronics Engineering

Second Upper Class Honors (2.1), 2018–2023

Relevant Coursework: Algorithms & Data Structures, OOP, Assembly, Microprocessors, Optimization, Problem Solving, Complexity Analysis

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, C, C++, HTML, CSS
 - **Frameworks:** React.js, Next.js, Angular, Spring Boot, Express.js, Django REST Framework
 - **Databases:** PostgreSQL, SQL
 - **Tools & Platforms:** Docker, Git, GitHub, GitLab, Postman, AWS, Render, Jira, CI/CD Pipelines
 - **Testing:** Selenium, Pytest, Unit Testing
 - **UI/UX:** Figma, Canva
 - **Operating Systems:** Linux, Windows
-

EXPERIENCE

Kommitly — Founder & Full-Stack Developer

Jan 2025 – Present

- Designed and developed a goal-tracking platform with AI task decomposition using Llama models - Built REST APIs using Django and PostgreSQL, deployed to Render - Developed responsive React.js frontend with a strong UX focus - Integrated CI/CD pipelines for automated deployment - Managed sprint cycles and architecture as a solo founder

ZOLA Reviews — Fullstack Developer

Sep 2024 – Dec 2024

- Developed scalable REST APIs using Django REST Framework - Built a responsive React.js frontend with secure user auth systems - Integrated AWS S3 for cloud-based storage - Managed CI/CD workflows for streamlined deployment

Numeral IOT — Software Engineer Intern

Jan 2023 – Apr 2023

- Designed and tested REST APIs; collaborated on frontend feature integration - Worked with cross-functional teams using Git and Agile methodologies - Strengthened backend and Linux systems skills

J.P. Morgan Virtual Experience (Forage)

May 2024

- Debugged and configured a web-based stock monitoring system using Perspective
-

PROJECTS

Crypto Dashboard — React.js, Redux, Node.js, Express, ApexCharts

- Developed a dashboard that fetches real-time data via CoinGecko API

Ecommerce Automation Testing — Selenium, Pytest

- Wrote automated tests for a production-grade e-commerce site

Twitter Sentiment Analysis Bot — Python, Tweepy, Scikit-learn

- Created a machine learning classifier to assess tweet sentiment

Smart Walking Stick — Arduino, C/C++, Proteus

- Built an assistive device for visually impaired navigation using sensors and microcontrollers

Ecommerce Food Ordering App — Angular, TypeScript, Docker

- Designed and deployed a web app with Docker containerization

Socket Programming Tool — Python

- Developed TCP-based server and client communication interface
-

CERTIFICATIONS

- **Lightning Developer BootCamp** — Africa Free Routing (2024)
- **J.P. Morgan Software Engineering Virtual Experience** — Forage (2024)
- **Beginner's Guide to Agile in Jira Badge** — Atlassian (2024)
